(a)
RMSE(S) / RMSE(F) for xi
bounded tail
exponential tail
heavy tail
B = 10
B = 50
Sample size m (log scale)
(b)
Coverage of 90% interval
bounded
exponential
heavy
Sample size m (log scale)
(c)
Cost of one fit (s)
bounded
exponential
heavy
Full−data Laplace
Sample size m (log scale)
(d)
Cost of one fit (s)
Symbolic, GEV
Symbolic, GPD
Full−data Laplace (median)
Resolution B
